PROFILE

- Hi, I'm Sourabh Arvind Nale, a Full Stack Web Developer from Satara with a background in commerce (M.Com) and a passion for coding. I completed a full stack course at ISTEPUP Baramati and worked for 1 year and 2 months at Ajspire Technologies, where I developed live static and dynamic projects using Laravel, PHP, and MySQL.
- Currently at Cloudregex Infotech, I'm enhancing my skills with modern tools and cloud technologies. I'm proficient in HTML5, CSS3, Bootstrap 5, JavaScript (ES6+), Laravel 10, PHP 8.2, MySQL 8.0, and tools like GitHub, Bitbucket, VS Code, Cursor, ChatGPT, Gemini, and DeepSeek.
- I enjoy building fast, clean, and user-friendly web applications— and I'm now looking for new opportunities to grow and contribute.

WEB PROJECTS CREATED WITH LARAVEL

Technology Used : HTML, CSS, Bootstrap and JavaScript for the front end and Laravel - A PHP framework for the back end and MySQL database for storing the data.

Hash Programming - Web App URL

- Hash Programming is an educational platform offering coding classes in C, C++, Java, Python, Web Development, and more. The site includes details about each course, student testimonials, an "About Us" section introducing the institute and its goals, and a contact form for inquiries. It's designed with a modern, responsive layout aimed at enhancing the learning experience.

Orange Makeover - Web App URL

- Orange Makeover is a clean and responsive Laravel-based website for a beauty training institute. It includes dynamic pages like Home, About, Courses, Services, Blog, Gallery, and Contact. The admin panel allows easy content management without code changes. Built with Laravel Blade and Bootstrap, it offers modern UI, form handling, and SEO-ready blog support. It's perfect for institutes offering training and services.

THE CANE STORY - Web App URL

- An online platform to buy natural jaggery products. Built with Laravel, it pulls product data from thecanestory.in, supports online payments, and provides features like cart, checkout, order tracking, and admin management.

SHIV SAMRAJYA – Ecommerce & Billing - Web App URL

- This project is also created with Laravel – A PHP Framework. Basically, this is an Ecommerce website integrated with a Billing Software that contains Purchase Sales, POS and so on. This is a multiple franchise system where admin can create more franchises and sale products to them and track profit and as more features like this.

BALAJI E SEVA - Web App URL

- This is a online documentation portal where end user can get his own Adhaar Card, PAN Card and so on. This project is built using Laravel and Integrated a Payment gateway and third Party for APIs for Recharges and Money Transfer.

Hire Top Skills - Web App URL

- This project is also created with Laravel – A PHP Framework. Basically, This Hire Top Skill is an innovative job portal platform designed to connect employers with top talent in the industry. The platform not only facilitates job searches and applications but also provides valuable insights and resources through an integrated blog.

OPED Academy - Web App URL

- This project is also created with Laravel – A PHP Framework. Basically, "OpEd" stands for "Opening the Doors of Education," OpEd is online education academy which provides one spot solution for IGCSE, CBSE, IB and ICSE students in their study.
